

Single-Tower Combined Play Structure - Low VVZ-VZ1-007-10-T

VVZ-VZ1-007-10-T Single-Tower Combined Play Structure - Low

A single-tower combined play structure that children can climb via steps, a climbing wall with handholds, or a rope net, and descend via the slide. Its striking design invites play from a distance. The steel structure is weather-resistant thanks to galvanising and a durable powder-coated finish. The HPL material used is chemically resistant, UV-resistant - color-stable, non-toxic, recyclable, and resistant to breakage, so children are not at risk of injury from sharp edges or splinters. The ropes are made of polyester fibers wound around a central reinforcement. This rope construction increases strength and resistance to mechanical wear. Polyester itself is resistant to microorganisms and weathering, dries quickly after rain, is color-stable, and offers high strength. All joints are stainless steel and covered with plastic protective caps to increase durability and safety.

Specifications

The Single-Tower Combined Play Structure - Low VVZ-VZ1-007-10-T is certified according to STN EN 1176

Age Group:	3-14 years
Product Dimensions:	3.20 x 1.20 x 2.00 m (L x W x H)
Max. Fall Height:	up to 0.99 m
Safety Surfacing Area:	6.50 x 4.30 m (according to STN EN 1176-1)
Materials:	Galvanised and powder-coated steel, HPL, LDPE, polypropylene rope, stainless steel fasteners
